Subject index

Accumulation of pentamannose oligosaccharides in human mononuclear leukocytes by action of swainsonine, an inhibitor of glycoprotein processing, 327
3-Acetamido-2,6-anhydro-1,3-dideoxy-1-nitro-D-*glycero*-D-*gulo*-heptitol monohydrate, crystal and molecular structure, 349
3-Acetamido-3,6-dideoxygalactopyranose, a component of the capsular antigen of *Escherichia coli* serotype K45, 191
Agarose, analysis by the reductive-cleavage method, 267
Analysis of agarose by the reductive-cleavage method, 267
Antibiotics flambamycin, curamycin, and avilamycin, synthesis of a terminal A-B-C fragment of the, 107
O-23 Antigen (LPS) from *Escherichia coli* O23:K?:H16, structure of the O-specific polysaccharide of the, 233
O-Antigen of *Escherichia coli* O64;K99 lipopolysaccharide, the characterization of the, 277
O-Antigen polysaccharide, structural studies of the *Vibrio cholerae* 0:5, 199

Benzylated cycloisomaltotetraose, synthesis of, 377
endo-Benzylidene acetals, stereoselective preparation of dioxolane-type, by kinetically controlled reactions, 361
tert-Butyldimethylsilylation of the 6'-hydroxyl group of lactose derivatives via their dibutylstannylene acetals, regioselective, 365

Calculations, Metropolis Monte Carlo, application of multidimensional clustering analysis to conformational data sets obtained by: The conformations of cyclic (1 → 2)-ß-D-glucans, 55
Capsular antigen of *Escherichia coli* serotype K45, 3-acetamido-3,6-dideoxygalactopyranose as a component of the, 191
Capsular polysaccharide of *Klebsiella* K43, primary structure and depolymerisation by a viral-borne endoglycanase, 213
Carrageenan, ultrastructural evidence for intramolecular double stranding in iota-, 225
ß-Cellobiosylnitromethane and ß-maltosylnitromethane heptaacetate, crystal and molecular structures, of, 37
Clustering analysis, multidimensional, application of, to conformational data sets obtained by Metropolis Monte Carlo calculations: The conformations of cyclic (1 → 2)-ß-D-glucans, 55
Conformation of the monomethyl ethers of methyl ß-lactoside in D_2O and Me_2SO-d_6 solutions, 15
Conformational flexibility of the arabinofuranose ring, Part 1. Modelling of arabinofuranose and arabinan, 81
Conformationally restricted analogues of the muramyldipeptide MDP, 95
Conformations of cyclic (1 → 2)-ß-D-glucans, the: Application of multidimensional clustering analysis to conformational data sets obtained by Metropolis Monte Carlo calculations, 55
Control of the synthesis of dextran and acceptor-products by *Leuconostoc mesenteroides* B-512FM dextransucrase, 339
Crystal and molecular structure of 3-acetamido-2,6-anhydro-1,3-dideoxy-1-nitro-D-*glycero*-D-*gulo*-heptitol monohydrate, 349
Crystal and molecular structures of ß-cellobiosylnitromethane and ß-maltosylnitromethane heptaacetate, 37
Crystal and molecular structures of D-*glycero*-L-*gulo*-heptitol, *meso*-*glycero*-*allo*-heptitol, and *meso*-*glycero*-*allo*-heptitol heptaacetate, 45
Crystal structure and synthesis of methyl 2-amino-2,6-dideoxy-α-D-glucopyranoside-6-sulfonic acid, 1
ß-Cyclodextrins, naphthylethylcarbamoyl-, regioselective synthesis and characterization of, 119

Cycloisomaltotetraose, synthesis of benzylated, 377

Deacetylated lysogangliosides (breakdown products of GM1), preparation and characterisation of four new variously, 251
Dextran and acceptor-products by *Leuconostoc mesenteroides* B-512FM dextransucrase, control of the synthesis of, 339
Dextransucrase, control of the synthesis of dextran and acceptor-products by *Leuconostoc mesenteroides* B-512FM, 339
Dioxolane-type *endo*-benzylidene acetals, stereoselective preparation by kinetically controlled reactions, 361
Disaccharide fragment of flambamycin, curamycin, and avilamycin, synthesis of a terminal A-B-C, 107
Double stranding in iota-carrageenan, ultrastructural evidence for intramolecular, 225

Enzymatic synthesis of some *O*-ß-D-digalactosyl glycopeptides, using ß-D-galactosidase, 317
Escherichia coli O4:K6 and O4:K52, structural comparison of the O4-specific polysaccharides from, 241
Escherichia coli O64;K99 lipopolysaccharide, the characterization of the O-antigen of, 277
Escherichia coli serotype K45 capsular antigen, a glycan containing 3-acetamido-3,6-dideoxygalactopyranose, 191
Escherichia coli O23:K?:H16, structure of the O-specific polysaccharide of the O23-antigen (LPS) from, 233

Feruloyl oligosaccharides from spinach-leaf cell walls, structural characterization, 179
Flambamycin, curamycin, and avilamycin, synthesis of a terminal A-B-C disaccharide fragment of, 107
3′-Fluoroketonucleoside derivatives, synthesis and antineoplastic properties of 3′-deoxy-, and correlations between structure and biological activity, 143
D-Fructose, quantitative determination of the effect of pH and temperature on the *keto* form of, by FT IR spectroscopy, 355
FT IR spectroscopy, quantitative determination of the effect of pH and temperature on the *keto* form of D-fructose, 355

Galactosyl glycopeptides, enzymatic synthesis of some *O*-ß-D-di-, using ß-D-galactosidase, 317
Glucans, (1 → 2)-ß-D-, the conformations of cyclic: Application of multidimensional clustering analysis to conformational data sets obtained by Metropolis Monte Carlo calculations, 55
D-Glucopyranoside-6-sulfonic acid, synthesis and crystal structure of methyl 2-amino-2,6-dideoxy-α-, 1
Glucopyranosylnitromethane monohydrate, crystal and molecular structure of 2-acetamido-2-deoxy-ß-D-, 349
D-Glucose oligosaccharides in cellulose chars, 151
Glycopeptides, enzymatic synthesis of some *O*-ß-D-digalactosyl, using ß-D-galactosidase, 317

Heptitol, crystal and molecular structures of D-*glycero*-L-*gulo*- and *meso*-*glycero*-*allo*-, 45

3-*O*-(2-Iodoethyl)-D-glucose, a stable iodo-derivative of D-glucose for medical imaging, 371

Ketonucleoside derivatives, synthesis and antineoplastic properties of 3′-deoxy-3′-fluoro-, and correlations between structure and biological activity, 143
Klebsiella K43 capsular polysaccharide, primary structure and depolymerisation by a viral-borne endoglycanase, 213

Lactose derivatives, regioselective *tert*-butyldimethylsilylation of the 6′-hydroxyl group of, via their dibutylstannylene acetals, 365
ß-Lactoside, conformation in D_2O and Me_2SO-d_6 solutions of the monomethyl ethers of methyl, 15
Lipopolysaccharide of *Escherichia coli* O64;K99, the characterization of the O-antigen of, 277
Lysogangliosides (breakdown products of GM1), preparation and characterisation of new variously deacetylated, 251

ß-Maltosylnitromethane and ß-cellobiosylnitromethane heptaacetate, crystal and molecular structures of, 37
Methyl 2-amino-2,6-dideoxy-α-D-glucopyranoside-6-sulfonic acid, synthesis and crystal structure, 1
Methyl ß-lactoside monomethyl ethers, conformation in D_2O and Me_2SO-d_6 solutions, 15
Modelling of arabinofuranose and arabinan. Part 1: Conformational flexibility of the arabinofuranose ring, 81
Molecular and crystal structures of D-*glycero*-L-*gulo*-heptitol, *meso*-*glycero*-*allo*-heptitol, and *meso*-*glycero*-*allo*-heptitol heptaacetate, 45
Monte Carlo calculations, Metropolis, application of multidimensional clustering analysis

to conformational data sets obtained by: The conformations of cyclic (1 → 2)-ß-D-glucans, 55
Muramyldipeptide MDP, conformationally restricted analogues of the, 95

Naphthylethylcarbamoyl-ß-cyclodextrins, regioselective synthesis and characterization of, 119
Nucleoside derivatives, synthesis and antineoplastic properties of 3′-deoxy-3′-fluoroketo-, and correlations between structure and biological activity, 143

Oligosaccharides, structural analysis of tamarind seed xyloglucan, using ß-galactosidase digestion and spectroscopic methods, 285
Oxazolidine ring system, conformationally restricted analogues of the muramyldipeptide MDP based on the D-glucopyrano[2,3-*d*]-, 95

Pectin, progressive dissociation of, 303
Pentamannose oligosaccharides in human mononuclear leukocytes by action of swainsonine, an inhibitor of glycoprotein processing, accumulation of, 327
Pivaloylated saccharide intermediates, synthesis and utilisation of partially, 129
Polysaccharide from *Klebsiella* K43, primary structure and depolymerisation by a viral-borne endoglycanase, 213
Polysaccharide from *Vibrio cholerae* 0:5, structural studies of the O-antigenic, 199
Polysaccharide of the O23-antigen (LPS) from *Escherichia coli* O23:K?:H16, structure of the O-specific, 233
Polysaccharides from *E. coli* O4:K6 and O4:K52, structural comparison of the O4-specific, 241

Reductive-cleavage method, analysis of agarose by the, 267
Reductive-cleavage method, structural analysis of sialic acid-containing carbohydrates by the, 167
Regioselective *tert*-butyldimethylsilylation of the 6′-hydroxyl group of lactose derivatives via their dibutylstannylene acetals, 365

Saccharide intermediates, synthesis and utilisation of partially pivaloylated, 129
Sialic acid-containing carbohydrates, structural analysis of by the reductive-cleavage method, 167
O4-Specific polysaccharides from *E. coli* O4:K6 and O4:K52, structural comparison of the, 241
Spinach-leaf cell walls, structural characterization of feruloyl oligosaccharides from, 179
Stereoselective preparation of dioxolane-type *endo*-benzylidene acetals by kinetically controlled reactions, 361
Swainsonine, an inhibitor of glycoprotein processing, accumulation of pentamannose oligosaccharides in human mononuclear leukocytes by action of, 327
Synthesis and utilisation of partially pivaloylated saccharide intermediates, 129
Synthesis of benzylated cycloisomaltotetraose, 377

Tamarind seed xyloglucan oligosaccharides, structural analysis of, using ß-galactosidase digestion and spectroscopic methods, 285

Ultrastructural evidence for intramolecular double stranding in iota-carrageenan, 225

Vibrio cholerae O:5, structural studies of the O-antigen polysaccharide from, 199

Xyloglucan oligosaccharides, structural analysis of tamarind seed, using ß-galactosidase digestion and spectroscopic methods, 285
